GLOBAL ROAD MAINTENANCE SYSTEMS PTY LTD

ROAD, STREET AND PARK SURFACING

COMPANY PROFILE

Global Road Maintenance Systems (GRMS) is an Australian owned and operated road servicing company specialising in the installation of automated resin systems and specialist surfacing requirements for the highway, marine, transport and road maintenance sectors.

GRMS has been researching better and safer ways to install road surfacing systems and lower road fatalities for over 20 years. As a result, GRMS has created Australia's first high-tech, advanced, fully-automated road installation truck — Maximus. Designed for the installation of calcined bauxite high-friction surfacing, coloured road surfacing and microsurfacing, Maximus will revolutionise the road industry, improving productivity, increasing safety, improving road conditions, maximising ROI, increasing efficiency, lowering the risk of workplace incidents and roadworks duration. Maximus will introduce a new way of working.

Operating for more than 22 years, GRMS is a unique one-stop-shop for all your project and road working requirements.

PRODUCTS AND SERVICES

GRMS provides a unique and extensive range of surfacing products that are designed to improve the visual definition, skid resistance, waterproofing and design of any project. GRMS supplies and installs a wide range of surfacing solutions to enhance your project requirements, with custom work available to meet specific client needs such as knowledgeable colour matching or creating unique stencils and patterns for any project.

- High-friction Calcined Bauxite Anti-skid Treatments
- Coloured Road Surfacing (CRS) | OzSpray & OzGrip CST
- Line Marking | Thermoplastic, CAP, paint, melt on, RRPMS and temporary lines
- Removals | Colours, lines, grinding and repairs
- Concrete Works | Stencilling, cleaning, sealing, polishing, repairs and shot blasting
- Traffic Control Services | Special events, council, government works, plans and permits
- Bridge Works | APJ joints, bridge deck resurfacing and waterproof membranes
- Cleaning | Street sweeping, colour maintenance, specialised road washes and carparks
- Decorative | Walkways, parks, images, patterns, colours, porous paving, tree pits and multipurpose sports courts

ANSTON ARCHITECTURAL PRODUCTS

BEAUTIFUL CONCRETE PRODUCTS FOR THRIVING LANDSCAPES

COMPANY PROFILE

Anston is renowned in the landscape industry as a trusted Australian manufacturer of luxury, high quality architectural concrete pavers and landscape features that beautify high-end residential and commercial projects.

Working closely with landscape architects, specifiers and contractors, Anston's generous selection of 80+ standard concrete paving and coping sizes in 26 stunning colours provide plenty of design flexibility, with options available to suit any design style.

Anston's team of concrete artisans also possess a high level of fabrication expertise for custom products, allowing designers additional flexibility with the option to use custom sizes and forms to cater to unique project requirements.

Anston products are popular not only for their visual appeal, but also for the high-quality finish and enduring performance that make them a long-lasting investment.

PRODUCTS

Anston specialises in the manufacture and supply of luxury architectural precast concrete products, including, but not limited to:

- Concrete paving
- Reinforced pedestal pavers
- Pool coping and wall capping
- Cladding tiles
- Stair treads and risers
- Precast concrete street furniture
- Reinforced safety bollards
- Concrete planters

As Australia's first (and only) supplier of reinforced pedestal pavers, Anston has designed a paving product created specifically for use in raised pedestal systems. Their innovative pedestal paver design features an in-built security feature that is embedded into the body of each individual paver, increasing structural integrity and reducing the risk of paver failure. This effectively protects pedestrians from potential harm, reducing the risk of them falling through the raised pavement level to the sub-base underneath.

COMPOSITION AND MANUFACTURE

All Anston products are made with locally sourced sand and stone materials, monitored under strict quality controls to ensure compliance with the requirements in AS/NZS 4455.2-2010 as well as ISO 9001 for Quality Management.

A member of the larger SVC Group, Anston is committed to reducing its environmental impact. The business has invested significantly in environmental initiatives such as renewable energy, rainwater harvesting and the adoption of recycled waste materials in their concrete products, resulting in reduced carbon emissions.

Launched in 2023, Anston EcoPebble is a sustainable concrete paving range featuring four concrete colour mixes produced with blended cements, manufactured sands and recycled waste materials. Compared to standard concrete paving, EcoPebble products have fewer associated carbon emissions and bring benefits to the environment and ecosystem by diverting hazardous waste by-products away from landfills.

NATIONAL PRECAST CONCRETE ASSOCIATION AUSTRALIA

WHO IS NATIONAL PRECAST?

National Precast Concrete Association Australia (NPCAA) is the peak industry body representing the country's precast concrete sector. As the trusted voice for the industry, NPCAA connects manufacturers, suppliers and stakeholders across Australia to promote innovation, quality and sustainable construction using precast.

Its membership spans small businesses to major national players, supplying a diverse range of precast products used in public spaces, infrastructure, commercial and residential projects. From elegant architectural panels to durable kerbs, barriers and street furniture, precast delivers both form and function.

WHY PRECAST CONCRETE?

For landscape and architectural designers, precast concrete offers a unique combination of design versatility, structural performance, durability, sustainability and more, including:

- Design freedom: Moulded to virtually any shape, size, or surface finish, precast opens creative opportunities for bespoke pieces and large-scale repetition.
- Durability: Weather, pest and impact resistant, precast structures offer exceptional longevity and low maintenance.
- Quality assurance: Factory-controlled conditions ensure precision, consistency, and high-quality finishes that stand the test of time.

- Faster delivery: Off-site manufacturing means shorter construction timeframes, less site disruption, and greater project certainty.
- Sustainable choice: With recycled content, reduced site waste, and excellent thermal properties, precast is a responsible material solution.

UPSKILLING WITH MICRO-CREDENTIALS

As demand grows for sustainable and efficient construction, National Precast is helping upskill the industry with a suite of micro-credentials for anyone who works in or with precast. These short, online training units support higher quality outcomes, boost site safety, and foster a deeper understanding of how precast integrates into landscape and architectural projects.

For specifiers and design professionals, that means increased confidence - not only in the consistency, compliance and safety of the finished product - but also in being able to fully leverage the performance and aesthetic benefits of precast. With a better understanding of how precast is made, handled and installed, the design community can make more informed choices, push creative boundaries, and extract maximum value from the material.

BAINES MASONRY

MASONRY MANUFACTURER

COMPANY PROFILE

Established in 1982, Baines Masonry is a family-owned company at the forefront of innovation in the Australian concrete manufacturing industry. Baines Masonry offers a range of products, including but not limited to interlocking retaining wall systems, concrete blocks and paving, available in a wide variety of colours. All of its patented products are Australian designed and owned.

Baines Masonry products are ideal for commercial and residential applications and are manufactured by quality licensed manufacturers in Australia and New Zealand.

PRODUCTS

Baines Masonry manufactures a range of segmental retaining wall systems to satisfy all landscaping needs from residential to engineered commercial applications.

Tasman® and Norfolk® | The preferred retaining wall systems utilised by landscape architects, designers, contractors and homeowners. Available in a range of colours and textures

Abraded Gardenstone® | The perfect garden block to feature in any pathway or garden bed

Wallaroo Concrete Sleepers | Easy to install, high-strength retaining wall system suitable for near vertical and very high retaining walls

Architectural masonry | Honed, polished, split and smooth face

Lockblock® | A thin-bed mortar system

Split Face | Textured stone-like faced masonry blocks

Other products | Lightweight, eco-friendly masonry blocks

ENVIRONMENTAL COMMITMENT

Baines Masonry is committed to choosing what is best for the environment in all aspects of its business. The company's production processes, which include cutting-edge recycling technologies, are second to none in their environmental credentials.

The Baines Masonry production facility at Appin has been configured to:

- Lower embodied energy
- Reduce greenhouse gases
- Increase recycling
- Eliminate water pollution
- Preserve fauna and flora

INTEGRATED POWER

LED LIGHTING PRODUCTS AND SOLUTIONS

COMPANY PROFILE

Integrated Power is a proudly Australian-owned and -operated company based in Perth, Western Australia, that has serviced the lighting industry for over a decade. With a firm commitment to performance and sustainability, Integrated Power designs and delivers advanced lighting systems tailored to meet the demands of any project.

Over the past 10 years, Integrated Power has successfully delivered thousands of lighting installations ranging from new commercial builds to extensive retrofit projects. Its products are engineered with durability and efficiency in mind, ensuring long-term performance in even the most demanding industrial and commercial settings.

As a manufacturer, Integrated Power can create bespoke exterior lighting solutions and services that include specialised lighting designs, comprehensive technical support, design and construct project management and the development of custom luminaires. Integrated Power is also widely recognised for its capabilities in large-scale sports lighting installations, offering solutions for arenas, stadiums and community sports facilities.

Integrated Power is a trusted partner to hundreds of clients nationwide including electrical contractors, commercial builders, local councils and private enterprises. The company's extensive product range, combined with its agile and client-focused approach, allows it to deliver tailored lighting solutions that meet the diverse needs of projects across Australia.

PRODUCTS AND SERVICES

Integrated Power specialises in delivering innovative lighting solutions across a diverse range of industries and applications including:

- Exterior architectural projects, including RGB
- Carparks and roadways
- Security and safe-movement lighting
- Parks and open spaces
- Walkways and pedestrian areas
- Sporting grounds and arenas
- Smart lighting and wireless lighting control

Integrated Power manufactures and locally stocks a wide range of exterior luminaires including:

- RGB exterior facade lighting
- Solar lighting
- High-output sports lighting
- Decorative poletop lighting
- Streetlighting
- Custom-made light fittings

Integrated Power also offers a range of lighting services including:

- Lighting designs such as lux level and uniformity calculations
- Post-installation site lux assessments
- RGB and coloured lighting design and technical advice
- Smart and wireless lighting design and advice
- Custom luminaire design services

COMPOSITION AND MANUFACTURE

Integrated Power utilises the latest generation of LED chipsets and drivers from leading brands such as Phillips, CREE, Inventronics, Sosen and Nichia to produce long-lasting LED fittings. It is also a product partner to Casambi wireless lighting control technology and offers a wide range of Casambi-enabled smart fittings.

DECO AUSTRALIA

ALUMINIUM TIMBER-LOOK SCREENS AND FENCES

COMPANY PROFILE

DECO Australia are leaders in aluminium building products and surface finishing. DECO's premium range of landscaping products and systems are all designed with durability, stability and easy installation in mind, allowing landscape architects and designers to effectively render design visions for parks, playgrounds, walkways and other outdoor spaces without the worry of deterioration from the elements or wear from frequent use.

All DECO products are available in a wide range of Super Durable™ finishes for long-lasting aesthetics, including the renowned DecoWood® timber-look aluminium finish, which effectively replicates the appearance and feel of natural timber without the deterioration and costly ongoing maintenance.

PRODUCTS AND SERVICES

Suitable for screening, fencing, gates and more, DECO's range of aluminium landscaping products offer strong, durable and dimensionally stable profiles to easily construct the perfect outdoor space.

DecoBatten® | A creative fencing and screening option for outdoor projects. This versatile batten product has a one-piece batten suitable for vertical floating fences and privacy screens. The two-piece QuickClick® system allows battens to be attached easily to an existing wall, gate frame or other structures.

Made from solid aluminium and available in a range of shapes including square, rectangular, rounded and angled profiles, DecoBatten® gives landscape designers the creative freedom and flexibility to experiment within their designs.

DecoPanel™ | A great solution for screening. Available in large panels of 1500mm x 3600mm, up to 3mm thick, each solid aluminium panel can be finished in DECO's range of durable timber-, concrete- or rust-look finishes with options for perforations and laser cutting for unique detailing.

DECO also offers a traditional fencing profile.

DecoSlat™ | A traditional style screening and fencing system. DecoSlat™ comes with profiles and accessories designed to create classic horizontal slat fencing, gates and screens.

DecoFence™ | An innovative, easy-to-install rural fencing option ideal for outdoor country spaces, DecoFence™ teams a typical rural fence design with quick and easy installation and extreme durability.

Other fencing and screen options by DECO include:

- Slip-resistant decking
- Non-combustible cladding
- Durable retaining walls

Available finishes | Each product is available in DECO's Super Durable™ finishes, which includes the timber-look DecoWood® finish as well as an array of rust- or concrete-look finishes or solid colour and anodised finishes, to add a contemporary, urban touch to landscape designs.

COMPOSITION AND MANUFACTURE

DECO's durable products are made from 100 percent solid aluminium, providing long-lasting, dimensional stability and non-combustible products. Finished in a marine-grade Super Durable™ sublimated powdercoat finish, which will not wear or peel off, DECO's innovative products are resistant to fading, rotting and corrosion, offering landscape designers the chance to create a long-lasting aesthetic without the need for any ongoing maintenance.

TERRA FIRMA | TERRAGRATE FRP

INFRASTRUCTURE IMAGINED DIFFERENTLY: FRP GRATING, FRP STRUCTURAL PROFILES AND COMPOSITE PIT COVERS

COMPANY PROFILE

Terra Firma Industries specialises in high-strength, load-bearing composites for use in infrastructure projects and commercial environments. The company's products are built for strength, durability, safety and ease of maintenance.

Terra Firma has pioneered the use of composites in access covers for over 20 years and continues to lead the way with fibreglass reinforced polymer (FRP) and glass reinforced plastic (GRP) composites for civil, public and commercial infrastructure.

PRODUCTS AND SERVICES

Terra Firma offers fire and chemical resistant, safe, non-slip, maintenance-free alternatives to troublesome wood, concrete and metal. Lightweight and load-bearing, Terra Firma's composites include FRP panels, structural profiles, handrails, stairs, ramps and pedestrian bridges.

TerraGrate™ FRP grating is ideal for public access, alpine, marine and poolside use. Its access covers are suitable for all applications from treepits to heavy-duty in-road covers. Terra Firma offers a range of engineering, design and build services.

COMPOSITE AND MANUFACTURE

Terra Firma Industries composite products are engineered to meet a comprehensive range of standards, including P5 slip-rating for all underfoot products and AS3996:2019 B, C, D and E-class ratings for access covers.

Chemical resistance, fire and smoke ratings come as standard but can be tailored further during manufacture for specific applications, if required.

FUTUREWOOD PTY LTD

COMPOSITE DECKING, ALUMINIUM SUBFRAME, SCREENING AND CLADDING DESIGNER, IMPORTER AND DISTRIBUTOR

COMPANY PROFILE

Futurewood Pty Ltd specialises in eco-friendly timber-alternative products that have a unique timber look and offer significant value through a range of outstanding features and benefits.

A viable alternative to timber, Futurewood's composite timber products are low maintenance, sustainable, splinter-free and rot- and termite-resistant. They won't split, cup or warp, and there is no sap or tannin bleed.

Concealed fixing options are available on all decking and weatherproof cladding products to ensure a clean finish. A design-registered aluminium joist and adjustable pedestal subframe system provides a rot-proof, lightweight subframe to support CleverDeck composite timber decking or other decking products.

PRODUCTS

CleverDeck Eco-Pro, Original and Xtreme | CleverDeck solid timber-composite decking is available in three product ranges: Eco-Pro, Original and Xtreme. Each range offers quality composite decking that is low maintenance and termite-, rot- and slip-resistant. The Xtreme range is also BAL-29 rated. CleverDeck Eco-Pro and Original is supplied in standard 138mm x 23mm x 5400mm-long boards. Eco-Pro has a weight- and heat-reducing scalloped-back design, while Original is a traditional, double-sided solid board. Both boards have a coarse sanded finish that achieves a P5 slip rating. CleverDeck Eco-Pro and Original are supplied in up to five designer colours: Black Bean, Mahogany, Slate Grey, Walnut and Weathered Stone. Other custom-made sizes, including 86mm and 184mm-wide boards with a range of additional colours and finishes, are available upon request.

CleverDeck Xtreme decking is supplied in either 138mm-wide or 185mm-wide boards. Both boards are 23mm thick and 5400mm long. CleverDeck Xtreme is a co-extruded composite timber product, made with a traditional composite-timber core that is fully capped with a virgin polymer blend. The hard outer shell of Xtreme decking offers greater scratch resistance, is virtually waterproof, is easy to clean and comes in a range of seven vibrant, blended colours with a high level of fade resistance. Colours include Rustic Merbau, Light Oak, Basalt, Ash Grey, Graphite, Desert Oak and Riverstone Grey.

An engineered aluminium deck framing system, with a full range of aluminium joists, bearers and adjustable height pedestals to suit deck heights from 48mm up to 523mm, completes the decking range. The joist profile and brackets provide a unique, design-registered range that is rot-proof, rust-proof, lightweight and strong. The full subframe solution is very cost effective as it is quick and easy to build with fewer screws required, meaning less time spent on installation.

EnviroSlat | EnviroSlat solid composite-timber fencing/screening is stocked in 70mm x 15mm x 5400mm-long solid boards, 40mm x 30mm x 5400mm-long solid boards, 60mm x 40mm x 5400mm-long solid boards and 90mm x 40mm x 5400mm-long solid boards. Stocked sizes are available in a range of colours including Midnight, Black Bean, Weathered Stone, Walnut and Slate Grey.

EnviroSlat weatherproof cladding is made to order in a 156mm x 21mm profile width, at any length from 1m to 5.8m long, in a range of colours. A selection of additional EnviroSlat sizes, colours and finishes are available as custom-made options upon request.

EnviroSlat fencing is due for release in 2025. With its double-sided castellated cladding board and proprietary aluminium frame system, it provides a unique solution for feature fences.

Custom Profiles | Other custom-made architectural profiles are available in a range of colours and finishes for use in street furniture, shade structures, facades, feature walls, fencing and more.

COMPOSITION AND MANUFACTURE

All CleverDeck and EnviroSlat products are wood plastic composite (WPC), made from recycled plastic, wood flour and rice husks. Xtreme capped boards include a skin of virgin polymers wrapped around a recycled composite-timber core.

The concealed-fix deck fixing system consists of four different types of stainless steel and nylon clips with blackened stainless-steel screws for fixing to either timber or steel joists.

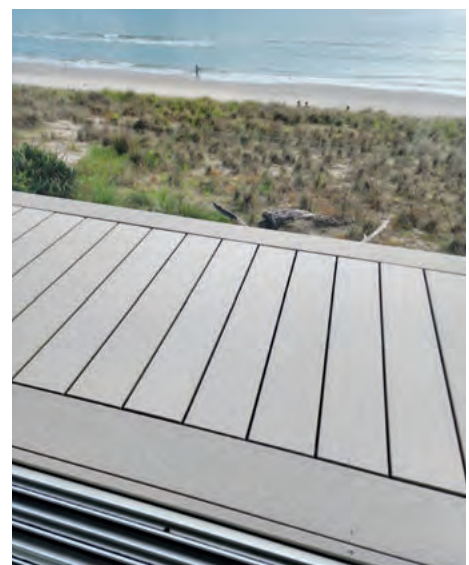

All products can be supplied in either pack lots or job lots.

NEPEAN BUILDING & INFRASTRUCTURE

INTEGRATED MANUFACTURER OF FABRICATED METAL PRODUCTS AND HOT-DIP GALVANISED SERVICES

COMPANY PROFILE

NEPEAN Building & Infrastructure is one of the leading integrated manufacturers of fabricated metal products and hot-dip galvanised services, supplying the architectural, civil, construction, industrial and infrastructure markets throughout Australia.

Established in 1955 as the Graham Group in Yagoona, NSW, NEPEAN Building & Infrastructure has evolved by providing specialised solutions and support through industrial manufacturing, galvanising facilities and supporting branches to service customers nationally.

Quality and compliance are key. Australian and international manufacturing facilities hold relevant accreditations for quality ISO 9001, environment ISO 14001 and safety ISO 45001. NEPEAN's Yagoona site is also home to its NATA-accredited product testing facility.

PRODUCTS AND SERVICES

Weldlok | As design and fabrication specialists for over 65 years, Weldlok produces durable and high-quality flooring, grating, handrail and civil drainage, stocked or custom configured to project needs. Weldlok also offers perforated and expanded metal in unique designs for architectural installation. weldlok.com.au

Galintel | For over 50 years, Galintel has been Australia's leading supplier and only local manufacturer of galvanised steel lintels. Proudly made in Coffs Harbour, the range includes off-the-shelf lintels (ie R4, J-bars and Cavi-T bar) designed for staying up to date with regulations and convenience. galintel.com.au

Galintel Outdoors | Galintel Outdoors extends Galintel's trusted engineering to outdoor products. Built on the success of its stair stringers and retaining wall posts, the brand now includes dual stair stringers, retaining wall posts and GO sleepers. Quality solutions for tradies and DIYers. galinteloutdoors.com.au

Galserv | From Sydney Airport to the Scenic Railway, Galserv has helped Sydney's most iconic infrastructure endure. As a founding member of the Galvanisers Association of Australia, Galserv is one of the largest hot-dip galvanisers in Australia, operating 24 hours and can provide hot-dip galvanising services for small, large or complex jobs. galserv.com.au

SCAVENGER SUPPLIES / GRATING FRP AUSTRALIA

SUPPLIER OF FRP STRUCTURAL AND GRATING COMPONENTS

COMPANY PROFILE

Scavenger Supplies is an Australian-owned specialist in industrial products and services with a focus on manufacturing control systems that provide an environmentally safe and healthy workplace for all.

Originally established in 2002, Scavenger Supplies services several specialist fields of industrial and construction industries, providing quality fibreglass structure and grating components produced by leading international manufacturers. The company's fibre-reinforced plastic (FRP) division, Grating FRP Australia, is renowned for its high-quality FRP structural products and systems.

From the design and supply of moulded and pultruded fibreglass gratings and structural shapes to complete structural design and fabrication, Grating FRP Australia has the capability to work with clients from design to installation while offering in-depth technical advice and quality service.

PRODUCTS AND SERVICES

Scavenger Supplies, operating as Grating FRP Australia, partner with innovative manufacturers to bring clients the latest, safest and most cost-effective FRP products.

With one of the highest strength-to-weight ratios of any material, FRP fibreglass grating is strong and durable, ensuring years of dependable use. Highly corrosion resistant, Grating FRP Australia products are manufactured with a variety of premium resin systems and will not rot, rust or corrode, making them suitable for a wide variety of harsh environments.

Coated with a silica grit top or all-resin meniscus top, FRP grating offers sure footing in unsafe work areas. Water, oils, detergents and food by-products no longer present a safety hazard in industrial work environments.

- Fibreglass grating
- Stair treads
- Stair covers
- Floor plates
- Roof access systems

Scavenger Supplies is supported by a Quality Management System that conforms to rigorous standards, including ISO 9001:2008

THE BENEFITS OF FRP

FRP products benefit a workforce that may suffer from on-the-job fatigue. Fibreglass grating is naturally flexible, providing a comfortable non-skid surface that can help to reduce fatigue and injury.

In addition to improving productivity and creating a better work environment, FRP is lightweight. With an average weight of 15 to 20 kilos per square metre, FRP moulded grating can be comfortably managed between two staff members, making it easy to carry and install or remove for maintenance access and cleaning.

DECO AUSTRALIA

TIMBER-LOOK ALUMINIUM DECKING

COMPANY PROFILE

DECO Australia are leaders in aluminium building products and surface finishing. DECO's premium range of landscaping products and systems are all designed with durability, stability and easy installation in mind. They are available in DECO's wide range of Super Durable™ finishes for long-lasting aesthetics, including the renowned DecoWood® timber-look aluminium finish, which replicates the appearance and feel of popular natural timber species.

PRODUCTS

DECO offers a range of timber-look aluminium products suitable for cladding, fencing, decking and more. The one-of-a-kind DecoDeck® revolutionises landscape design, offering a long-lasting and beautiful option for walkways, ramps, decks, steps, marinas and the like.

DecoDeck® features include:

- Natural woodgrain or contemporary concrete finishes
- Non-combustible and suitable for bushfire zones (BAL FZ)
- Corrosion-resistant for bridges, jetties, boardwalks etc
- No rotting, twisting or warping
- P4/R11 slip rating (safe for pools and spas)
- Dimensional stability (6.5m length boards)
- Super Durable™ scratch-resistant finish
- Available in two widths: 94mm and 134mm
- Dissipates heat for comfortable temperatures

DecoDeck's 'Class 2' Super Durable® DecoWood® finish provides beautiful timber appearance that will not fade, wear or peel off. Highly durable, no sanding, painting or staining is required for this low maintenance decking system.

COMPOSITION AND MANUFACTURE

DECO products are made from 100 percent non-combustible aluminium with a Super Durable™ sublimated powdercoat finish. DecoDeck® features a rubber-infused powdercoating for added slip resistance.

When living in high-risk zones like Bal-40 and Bal-FZ, only fully combustible materials are permitted. DecoDeck® is designed for the highest fire-risk areas, including Bal-FZ when the systems cover strips are used to eliminate gaps between boards.

LANDMARK PRODUCTS PTY LTD

OPEN SPACE STRUCTURES AND SOLUTIONS

COMPANY PROFILE

With over forty years experience, Landmark Products is a trusted leader in delivering complete public infrastructure solutions across Australia. Renowned for its end-to-end service, Landmark offers in-house design, manufacturing and installation, ensuring unmatched quality and reliability at every stage.

The company's products are 100 percent Australian-made, expertly designed to deliver bold visual impact alongside outstanding durability and functionality.

PRODUCTS AND SERVICES

Landmark designs, manufactures and installs products across Australia, including:

- Park shelters
- Access structures
- Restrooms
- Pedestrian bridges
- Solar structures
- Sporting and change room amenities
- Lighting by urbidermis
- Barbecues
- Street and park furniture

Ongoing maintenance programs are also available.

COMPOSITION AND MANUFACTURE

Material selection is paramount to creating a robust, low-maintenance, long-lasting product for public use. Landmark is skilled in selecting materials to suit the local environment. Its extensive product range is constructed from the highest quality timber, steel, aluminium, stainless steel, wood-plastic composite or fibre-reinforced plastic to ensure optimal material selection for project specifications.

PROJECTS

Park shelters and street furniture | Jells Park VIC
 Bridge and park shelters | Jensen Park Pelican Waters QLD
 Changing places facility | Churchill Park WA
 Beach access structure | Two Rocks WA
 Ron Payne Sports Facility | North Epping NSW
