RAINBOW SHADE

SOLAR PROTECTION FABRIC SUPPLIER

COMPANY PROFILE

For over 30 years, Rainbow Shade has been supplying premium quality shade fabrics Australia-wide for the manufacture of shade sails, shade structures and outdoor shade umbrellas. These shade solutions have been used extensively for playgrounds, public spaces, residential and commercial projects.

These shade fabrics not only provide protection from the harmful effects of the sun, they also help create unique outdoor environments that look great and last for years.

PRODUCTS AND SERVICES

Shade fabrics by Rainbow Shade are unrivalled in three crucial areas for any shade solution, with an unmatched reputation for durability, UV protection and quality. With state-of-the-art manufacturing processes combined with the use of the highest quality polymers and UV-stabilisers, Rainbow Shade products provide many favourable benefits.

UV-R protection | Around Australia, fabrics by Rainbow Shade are renowned for their elite UV-R protection offering up to 99 percent UV-R block. With this protection, families and individuals can enjoy the outdoors with reassurance of protection against the harsh effects of the sun.

Durability | Rainbow Shade fabrics have been used extensively around Australia for many commercial projects. Through this, its fabrics have proven durability and longevity. With this knowledge, Rainbow Shade is confident to back its fabrics with up to a 15-year warranty.

Colour range | Shade fabrics by Rainbow Shade are well-known for its vast colour ranges. Available in a suite of vibrant colours, designing a shade sail and structure to suit any outdoor area has never been easier.

Extreme 32 | Rainbow Shade's Extreme 32 range is one of Australia's most popular shade solutions for commercial projects. Extreme 32 boasts supreme strength and enduring durability. It is also backed by a 15-year warranty. Extreme 32 dramatically reduces heat, glare and UV radiation in any outdoor space, providing needed safety against the sun. Extreme 32 is ideal for:

- Commercial shade sails
- Shade structures
- Commercial carparks
- School shade sails
- Swimming pool shade sails
- Children's playground areas
- Council parks

Serge Ferrari | A global leader in performance textiles, Serge Ferrari offers premium PVC membranes designed for large-scale commercial and architectural shade structures. Made utilising patented Précontraint® technology, they deliver superior durability, dimensional stability and long-lasting weather resistance, making them ideal for projects where strength and style matter.

Rainbow Shade has access to numerous high-quality professionals nationwide willing to assist clients with all their shade needs. These highly experienced professionals lend their expertise to assist in design and manufacture of a suitable shade product to meet any projects requirements. As well, offering the best maintenance advice to guarantee long-lasting, high-quality installation.

PRO-KNIT INDUSTRIES PTY LTD

SHADECLOTH MANUFACTURER

COMPANY PROFILE

Pro-Knit Industries Pty Ltd is the leading manufacturer and supplier of 100 percent round monofilament commercial-grade knitted shadecloth. From its modern manufacturing facility in Brisbane, Pro-Knit produces the highest quality knitted shadecloth products available on the global market today.

Pro-Knit's popular Monotec heavy-duty commercial-grade shadecloth leads the field in strength, longevity and durability. It is the only locally manufactured shadecloth in Australia and is available in a choice of 3.25m and 6.5m widths.

Combining the highest quality UV-stabilised raw materials, the latest knitting-machine technology, and 100 plus years of industry experience, Pro-Knit Industries produces the very best shadecloth fabric to cover every project requirement.

PRODUCTS

Monotec shadecloth has been specifically developed as an extremely strong and stable fabric for use in tension structures, shade sails and shade awnings.

Engineered to Outlast | Monotec shadecloth offers the perfect combination of sun protection coupled with strength and durability. This premium fabric is UV resistant and supported by an industry-leading 15-year warranty. The sturdy fabric construction, made up of round monofilament yarns, will not stretch over time, ensuring the structural integrity of the shade product for many years to come.

Monotec shadecloths are specifically designed for:

- Commercial shade structures
- Shade sails
- Council parks
- Theme parks
- Commercial carparks
- Children's playground areas
- Outdoor school lunch areas
- Athletic field event areas
- Swimming pool canopies
- Outdoor recreation areas

PROJECTS

Since 2005, Pro-Knit Industries has manufactured and supplied Monotec shadecloth throughout Australia, USA, Europe and Asia. During this period, the team at Pro-Knit worked with fabricators, designers, architects, engineers and installers to provide high-quality shade solutions for schools, councils, parks and recreation spaces, including:

2024 Australian Open | Sydney NSW
Taronga Park Zoo | Sydney NSW
Sydney Aquarium | Sydney NSW

SHADE 'N' SAILS

AUSTRALIAN-MADE SHADE AND ALL-WEATHER STRUCTURES

COMPANY PROFILE

Shade 'N' Sails is a family-owned and -operated Australian company based in Ballarat, Victoria, with over 25 years experience in design, manufacture and installation of shade and all-weather structures.

With more than 250 years of combined industry experience, Shade 'N' Sails delivers tailored solutions for a wide range of environments, from early learning centres and schools to public spaces, sports facilities and commercial precincts. Whether the requirement is a single architecturally designed Flexshade® umbrella or a large-scale multi-court structure, each project is approached with a focus on durability, functionality and visual impact.

Shade 'N' Sails provides full project support, from initial consultation and site assessment through to design, engineering, fabrication and installation, ensuring a seamless and efficient delivery process.

PRODUCTS AND SERVICES

All Shade 'N' Sails structures are designed and manufactured using premium materials, including high-performance HDPE shadecloth for UV protection and PVC membranes for all-weather coverage.

All manufacturing is completed in-house, including steel fabrication, membrane welding and sewing, to maintains full control over quality, timelines and consistency. Installation is carried out by experienced in-house teams, covering everything from footings and structural steel to final membrane installation.

- Flexshade® Umbrellas | Architecturally designed umbrella structures providing both shade and weather protection in a range of sizes and configurations.
- Cantilever Structures | Ideal for carparks, walkways and seating areas, offering flexible design options for shade-only or all-weather coverage.
- Membrane Structures | Engineered solutions for large-scale applications such as sports courts and multi-use outdoor spaces.
- Hypar Umbrellas | Cost-effective shade-only structures suited to both small and large areas.
- Shade Sails | Custom-designed solutions ranging from single-sail installations to complex multi-sail coverage.
- Hip & Ridge Structures | Traditional framed structures suited to seating areas and large playspaces requiring extensive coverage.

WHAT SETS SHADE 'N' SAILS APART

- Proudly Australian made and owned | All structures are designed and manufactured locally, supporting Australian industry and ensuring compliance with national standards.
- Sustainable by design | Shade 'N' Sails operates using solar power, recycles fabric offcuts and continually seeks ways to reduce the environmental impact across all operations.
- End-to-end in-house capability | From design and engineering to fabrication and installation, every stage is managed internally for complete quality control.
- Proven national capability | With projects delivered across Australia, Shade 'N' Sails has the experience and systems to manage projects at scale.

SHADEFORM

SPECIALISTS IN PERMANENT AND RETRACTABLE SHADE AND ALL-WEATHER SOLUTIONS

COMPANY PROFILE

With over four decades of expertise, Shadeform designs, manufactures and installs a wide range of custom and modular shade and all-weather structures. From initial design consultation to fabrication and final installation, Shadeform provides full-service solutions for every project.

A proud multi-award-winning company, Shadeform has earned four prestigious Australian Textile Fabrication Industry Awards for excellence in commercial (2021, 2022, 2025) and residential (2025) categories.

PRODUCTS AND SERVICES

- Shade sail and membrane structures, umbrellas, retractable sails and roof systems, awnings, blinds and architectural wire systems
- Innovative and creative design services
- Professional engineering and fabrication contractors
- In-house patterning, plotting, cutting and fabrication
- Full installation by specialist site teams
- Supply-only service available in kit form

Shadeform also offers the popular Shaderunner® Retractable Shade System, a flexible solution installed across Australia and globally. *See the Shaderunner dataspec for more information.*

COMPOSITION AND MANUFACTURE

Shadeform uses only the finest quality high-strength shadecloths, monofilament, polyester mesh and PVC fabrics with posts and framework manufactured from high-quality Australian steel.

Fabrics are available in a wide selection of vibrant colours with supporting steelwork in a range of finishes, such as epoxy painted, galvanised or powder-coated.

All structures and footings are professionally designed by specialist engineering consultants.

SHADERUNNER® AUSTRALIA

RETRACTABLE, SELF-STANDING & EASY-ATTACHABLE SHADE SOLUTIONS FOR ALL WEATHER CONDITIONS

COMPANY PROFILE

The widely used Shaderunner® extends and retracts along stainless steel wires or alloy tracks, reducing the need for excessive beams, posts or structural parts. It offers simple control via an endless cord or motorised option, with custom motorised operation options available. Large spans can be achieved with a minimal support structure, while its flexibility also makes it ideal for compact or unique installations.

Shaderunner® is a proved, award-winning system, having secured four prestigious Australia Textile Fabrication Industry Awards for excellence in both commercial and residential categories.

PRODUCTS AND SERVICES

- Shaderunner® Classic | *Constructed all in one piece.* The Classic is the original Shaderunner®, designed and tested over 20+ years in the field. The fabric is constructed all in one piece, with fixed pulley positions.
- Shaderunner® Pro | *Fully adjustable fittings with individual panels.* The PRO model features fully adjustable fittings in all areas for greater flexibility. The individually fitted panels enable replacement if required, with alternate colours available.
- Shaderunner® Trax 'Pergo' | *Self-standing framed structure.* The Trax 'Pergo' features a multitude of bolt-together aluminium joiner connectors to ensure the best frame configuration for site conditions.
- Shaderunner® Trax 'Mono' | *Attach to existing structures.* The Trax 'Mono' is constructed using only the most robust components, including custom-designed aluminium tracks and supports, stainless-steel roller bearing wheels and marine grade fittings.

**Customised motorised operation options available*

STEEL POST & RAIL PTY LTD

OUTDOOR SEATING, SHADE AND STEEL STRUCTURES

COMPANY PROFILE

Outdoor solutions built to last. With over 35 years of industry experience, Steel Post & Rail (SPR) is a trusted family-owned business specialising in premium outdoor infrastructure. From shade structures and bus shelters to grandstands and outdoor furniture, SPR delivers functional, durable and aesthetically designed solutions that stand the test of time.

PRODUCTS AND SERVICES

SPR works directly with schools, councils and sporting organisations across Australia to design, manufacture and install custom-built shade and outdoor structures. The company's comprehensive range includes:

- Shade structures
- Grandstand seating
- Field shelters
- Bus area shelters
- Fencing and gates
- Outdoor tables and bench seating
- Storage enclosures
- Bespoke steel structures

All projects are managed inhouse, from concept to completion, by a skilled team committed to delivering seamless, high-quality outcomes. With a dedicated design department, SPR tailors each product to meet client needs, balancing form, function and budget.

SPR's structures are fabricated using galvanised steel, Colorbond, and Loc steel — materials selected for their durability, low maintenance and resistance to Australia's harsh climate conditions.

Taking pride in its precision, professionalism and personal service, whether you're planning a new seating area, covered walkway, or custom structure, SPR provides a complete solution you can rely on.

FROM THE STA BOARD

Community sports facilities are present across all states, districts and local government areas of Australia. In most cases they are the fulcrum of local community sport, health and social participation. Sports Turf Association of Australia is the leading association in supporting those who are employed or involved in the development and maintenance of sports turf fields and grounds, be that a golf course, racetrack, football field, soccer ground, cricket pitch, bowling green or similar. We are an inclusive association, with members ranging from CEOs to first-year apprentices and everything in between.

Our members are the "hidden heroes of sport". A not-for-profit volunteer organisation, this association has members across all of Australia striving for best practice in the development, research, education, innovation, information sharing and maintenance of turf sports grounds, be it a world-class stadium or a suburban bowling green. Our members are passionate about their industry and what it delivers to the health and benefit of society. The STA slogan befits our purpose: "We nurture turf sports of all sorts."

In addition, STA offers development opportunities for emerging sports turf industry leaders. For example, annually, each state STA association chooses its top Sports Turf Management Certificate III graduate to receive the Australian STA Graduate of the Year award. This award has been sponsored by Toro equipment for 11 years. Toro, like STA, believes it to be of immense value to the sports turf industry to develop better skills, practices and expanded knowledge for all in the industry.
The national Graduate of the Year winner is awarded an educational study tour of USA sports fields and turf research facilities, as well as access to the Toro International Sports Field and Grounds Forum.

STA, across all its chapters, offers its members great opportunities to continue learning about preparation of top-grade turf sport surfaces, as well as the opportunity to meet and build networks with turf managers who are equally passionate about their work. STA is about supporting and education the sporting industry.

Sports Turf Association, Australia Inc

SPORTS TURF ASSOCIATION AUSTRALIA (INC)

ASSOCIATION PROFILE

The Sports Turf Association Australia Inc (STA) is a not-for-profit organisation dedicated to the development and professionalism of sports turf management.

STA is a representative body for all sports turf-related workers and allied trades. Its members are from a variety of sports turf venues, including sports stadiums, golf courses, bowling greens, private schools and councils.

The Association is managed by a volunteer team of committee members who are dedicated to providing knowledge, resources and ongoing education and networking opportunities for its members.

The committee is elected by members of the Association and represents both active greenkeepers and representatives from industry-based organisations.

STA is represented in seven states: Queensland, New South Wales, ACT, Victoria, Tasmania, South Australia, and Western Australia.

EVENTS

Each STA state chapter conducts a variety of events throughout the year, including seminars and workshops. The purpose of these events is to encourage professional development, learn about industry changes and network with other professionals in the sports turf industry.

Some of these events include a hands-on approach to specific subjects, such as cricket wickets, sports field renovations, disease and weed and pest management, in addition to educational events.

All event information can be found on the STA website.

MEMBERSHIP

STA Australia encourages anyone from the turf industry to become a member of their State Association, which also includes membership to STA Australia. Each state has its own Member benefits.

Benefits include:

- Magazines
- eNewsletters
- Brochures for upcoming events
- Access to some of the best turf minds this country has to offer in regard to education, research, information and analysis

Belonging | Sports Turf Association has been set up for YOU. Have your say as to who makes up the committee at the Annual General Meeting. Meet fellow industry workers at events. Membership is a great networking opportunity!

TRADE MEMBERSHIP

STA Australia offers sponsorship opportunities at a national level and organisations can contact STA Australia directly for details.

FROM THE SAPIA PRESIDENT

The Sports & Play Industry Association's 140+ members embody the most skilled specialist sports, recreation and playground designers, builders and installers in the country. Our contractors are supported by manufacturers and suppliers of certified surfacing products as well as sports and play equipment, tested for compliance by our professional consultant members.

Our focus as a peak body is both to inform the marketplace as well as support our members in reaching and upholding the highest standards of sports and recreation construction. We want to ensure that the best sports courts and fields, recreation facilities and playspaces are designed, built, installed and maintained to a high standard, by people who hold relevant licences, have been trained to do the job correctly and who offer appropriate warranties.

Events such as the annual SAPIA National Conference keep our members informed on the latest research and development world-wide, and is an ideal networking opportunity for suppliers, consultants and installers. Our SAPIA Academy committee is developing training modules directly relevant to sports and playground surfacing and construction. We are progressively releasing Codes of Practice relevant to sports and playground construction, including the SAPIA Code of Practice for the Construction, Surfacing & Maintenance of Sports Courts, the SAPIA Code of Practice for the Construction of Padel Courts and the SAPIA Code of Practice for the Installation & Maintenance of Impact Attenuating Surfacing Systems for Playgrounds. Our members are proud to display the SAPIA logo, which is recognised as a mark of distinction in the sports and play industry, signifying that the holder is committed to supporting the highest construction, installation and maintenance standards. Be sure to check that your choice of contractor is a SAPIA member.

For membership enquiries, please contact the SAPIA Secretary on 1800 208 202. We look forward to advancing together in 2027.

Grant Humphreys | President, SAPIA

SPORTS AND PLAY INDUSTRY ASSOCIATION LTD

ASSOCIATION PROFILE

The Sports and Play Industry Association (SAPIA) is the peak industry body for sports, playground and recreation construction in Australasia. Its members are specialists in the design, construction, installation, testing and maintenance of sports facilities and playspaces, as well as the manufacture and supply of compliant sports and playground equipment.

SAPIA members include builders, subcontractors, manufacturers, suppliers and professional consultants. They have expertise in building and surfacing all types of sports and recreation areas, including tennis courts, padel and pickleball courts, playgrounds, basketball and netball courts, bowling greens, hockey fields, squash courts, athletic tracks, equestrian arenas, soccer fields, cricket pitches, golf courses, baseball fields, rugby and AFL fields, skateboard parks and velodromes.

Members manufacture and install sports floodlighting, fencing, all types of nets and goal posts, basketball towers, discus cages, shade structures and shade sails, synthetic grass and acrylic surfacing materials, as well as ancillary products. Consultants provide professional and technical services, facility design and engineering, as well as testing to Australian and International standards.

SAPIA is a one stop shop for sports and playspace construction information and installers. Among our tasks, we typically assist consumers and project managers seeking recommendations for sport court builders, schools and councils seeking advice on specifications, and principal contractors looking to subcontract to specialist sportsfield installers.

HISTORY

Established in 2000, SAPIA is a not-for-profit association promoting the best construction standards and business practices for the benefit of both members and their customers, as well as to contribute to the safe sporting pleasure of participants who use facilities constructed and/or serviced by members of the Association.

Initially known as the Tennis Court and Sports Field Builders Association of Australasia, in 2004 a name change to Sports Contractors Association better reflected the expansion of the membership to encompass not only builders but also sports equipment suppliers and professional consultants.

In 2016, with the further broadening of the membership to include specialist playground contractors and suppliers, the Association rebranded as the Sports and Play Industry Association (SAPIA).

OBJECTIVES

- To raise standards of design, construction and workmanship in the sports and recreation industries in Australasia.
- To encourage and promote sound and ethical business practices among our members through education and mentoring, the sharing of information and knowledge, and adherence to a code of ethics.
- To promote the skills and expertise of our Association's members to end users and sporting bodies.
- To raise consumer confidence and goodwill by offering advice and a dispute resolution service.
- To provide a representative voice for the industry to the public and regulatory authorities.

Put simply, SAPIA wants to make sure that the best sports courts, sports fields and playspaces are designed, built, installed and maintained to a high standard by people who have been trained to do the job right and who offer appropriate warranties, for the benefit of both the end users and contractors.

INDUSTRY ASSOCIATION LIMITED

CALIFORNIA SPORTS SURFACES

MANUFACTURER OF ACRYLIC SPORTS SURFACES

COMPANY PROFILE

California Sports Surfaces is a global leader in high-performance acrylic sports surfacing, with systems engineered for the world's most demanding sporting environments for over 70 years. Its portfolio of trusted brands, including Rebound Ace, Plexipave, CoolTop and DecoTurf, is independently certified by the ITF across multiple court pace classifications and has been used at Olympic venues, Grand Slam tournaments and community courts alike.

Backed by ICP Group, a global manufacturer of specialty coatings and construction solutions, California Sports Surfaces combines decades of surfacing expertise with exclusive technologies and close relationships with sporting bodies, specifiers and contractors across Australasia and beyond. Between multi-court redevelopments and elite-level competition venues, its surfaces are built to deliver consistency, durability and player safety across every level of play.

PRODUCTS AND SERVICES

California Sports Surfaces designs and manufactures surface systems for tennis, netball, basketball, pickleball and multisport facilities, including:

- Rebound Ace | Cushioned acrylic surfacing
- Plexipave | Premium hard court acrylic surfacing
- CoolTop | Solar-reflective surfacing for heat reduction
- DecoTurf | Hard court acrylic surfacing used at Grand Slam level

CALIFORNIA® SPORTS SURFACES

PLAYSPACES AUSTRALIA PTY LTD

OUTDOOR FITNESS & RECREATION SPECIALISTS

COMPANY PROFILE

Playspaces Australia delivers recreation infrastructure, active play environments, sports facilities and outdoor community spaces for local governments, schools, developers, landscape architects and commercial organisations across Australia.

Working with leading Australian and international manufacturers, the company supplies and delivers high-quality recreation and sports solutions that promote physical activity, social connection and community participation across all age groups.

As a Registered Builder, Playspaces Australia provides a complete service from concept design and planning through to project management, construction and installation. Its expertise includes playgrounds, padel courts, sports surfacing, outdoor fitness equipment, pump tracks, bike skills facilities, parkour equipment, skate facilities and thermoplastic educational environments.

By combining quality products, technical expertise and practical project delivery, Playspaces Australia creates engaging community spaces designed for long-term use and enjoyment.

PRODUCTS AND SERVICES

Playspaces Australia specialises in the design, supply and installation of recreation infrastructure, sports facilities and community space solutions for schools, local governments, developers and commercial organisations.

The company delivers a diverse range of active recreation environments, including playgrounds, outdoor fitness equipment, pump tracks, bike skills facilities, parkour equipment, skate facilities and multi-use community spaces. Services include project planning, product selection, construction and installation, ensuring each solution is tailored to the needs of the site, users and budget.

Playspaces Australia also supplies and installs premium padel courts for sports clubs, hotels, resorts, residential developments and tournament venues. Court systems are designed to provide durability, safety and long-term performance while meeting the specific requirements of each project.

Sports surfacing services include acrylic and cushioned coating systems for tennis, netball, basketball and multi-purpose courts. The company's advanced court systems are selected to deliver optimal playability, durability and shock absorption across a range of recreational and competitive sporting applications.

Through its dedicated thermoplastic markings division, Playmark, Playspaces Australia supplies and installs educational, recreational and sports markings for schools, parks and public spaces. These vibrant, durable markings support active play, learning, movement-based education and community engagement.

By combining premium products, technical expertise and end-to-end project delivery, Playspaces Australia provides integrated recreation and sports solutions that help communities create active, inclusive and engaging outdoor environments.

COMPOSITION AND MANUFACTURE

Products are sourced from leading Australian and international manufacturers, specified to suit the requirements of each project.

Sports surfacing systems utilise advanced acrylic, polyurethane and hybrid epoxy-acrylic technologies to provide durability, weather resistance, shock absorption and player comfort. System performance characteristics are tailored to the intended sport, usage levels and site conditions.

Padel court systems may incorporate galvanised steel, stainless steel, safety glass, engineered composites, UV-stable polymers and specialised sports surfacing materials.

Thermoplastic markings are manufactured from high-performance pre-formed thermoplastic materials incorporating durable pigments, aggregates and anti-slip properties. Designed for educational, recreational and sporting applications, the markings provide excellent colour retention, wear resistance and long-term performance in high-traffic outdoor environments.

All products are selected with consideration for Australian Standards, accessibility, safety, maintenance requirements and long-term asset performance. This keeps the technical focus of the section while giving Playmark's products equal prominence alongside the court and surfacing systems.

GLOBAL ROAD MAINTENANCE SYSTEMS PTY LTD

ROAD, STREET AND PARK SURFACING

COMPANY PROFILE

Global Road Maintenance Systems (GRMS) is an Australian owned and operated contracting company specialising in the installation of formulated resin systems and specialist surfacing requirements for the highway, marine, transport and maintenance sectors.
As a market leader in the application of high-friction (calcined bauxite), coloured surface treatments and safety surfacing for a broad spectrum of civil and commercial projects, including high-performance sports surfaces, GRMS is able to provide a unique and extensive range of surfacing products that are designed to improve the visual definition, skid resistance, waterproofing and corrosion control of asphalt, concrete and steel surfaces.

PRODUCTS AND SERVICES

GRMS supplies and installs a wide range of surfacing solutions. Custom work is available to meet specific client requirements, and the knowledgeable GRMS team can colour match or create unique stencils and patterns for any project, including:

- High friction anti-skid
- Coloured road surfacing (CRS)
- Line marking
- Bridge works
- High-performance sports surfaces

Maximus | Australia's first automated high-friction truck designed for the installation of high-friction surfacing, coloured surfacing and microsurfacing. Maximus revolutionises the road surfacing process.

STRABE GROUP

DESIGN-LED MANUFACTURER OF MODULAR STREETSCAPE FURNITURE

COMPANY PROFILE

StraBe Group is an Australian designer and manufacturer of distinctive modular streetscape furniture for civic, commercial, education, transport and landscape environments.

Working with landscape architects, architects, councils, developers and contractors, the company helps deliver outdoor spaces that are durable, functional and architecturally considered. With foundations in engineering and fabrication, StraBe brings together design innovation, ergonomics and material performance to support long-term public realm outcomes.

What distinguishes StraBe is its ability to combine proven modular systems with tailored project responses. For specifiers seeking streetscape outcomes that respond to site conditions, user needs and design intent, StraBe offers a collaborative approach from concept through to manufacture and delivery. This makes StraBe particularly valuable where standard products need to be adapted, refined or configured to better suit the broader architectural and landscape vision of a project.

PRODUCTS AND SERVICES

StraBe's manufacturing approach is built around durability, longevity and project suitability. Structural frame options include stainless steel, aluminium and mild steel, with material selection informed by environmental exposure and performance requirements.

Finishes are completed in-house, including powder coating, allowing for both design consistency and long-term protection. Material options include sustainably sourced Australian Spotted Gum timber and StraBe's proprietary Timballoy powder-coated aluminium battens, developed to provide the warmth of timber with enhanced durability and reduced maintenance.

MODUS AUSTRALIA

TOILET AMENITY BUILDING DESIGN, MANUFACTURE AND INSTALLATION

COMPANY PROFILE

Modus designs high-quality, robust toilet amenity buildings that look great and are designed to suit any application.

With 25 years of toilet building experience, Modus understands the complexities these projects bring, with shifting compliance standards, tight budgets, steep maintenance costs and the delays and blowouts caused by over promising suppliers and bloated procurement models. Modus have seen it all and built their process to cut through it.

Modus offers expert guidance through the entire design and construct process. Its services eliminate the need for external consultants, ensuring a seamless and stress-free experience. The company provides complimentary design consultations with clear scopes, accurate pricing, 3D concept visualisations and comprehensive documentation.

Whether requiring turnkey solutions or proprietary pre-fab modular building systems, Modus guarantees on-time, on-budget project delivery with clear, achievable outcomes.

PRODUCTS AND SERVICES

Modus's prefabricated toilet buildings streamline onsite assembly, ensuring cost-effectiveness, speed and accuracy. Delivered as prefab panels with pre-hung doors and pre-clad surfaces, along with all internal fixtures, these kits ensure quick and precise bolt-together construction without specialised teams.

Building types include:

- Standard (1–7 toilet cubicles)
- Shelter (1–7 toilet cubicles with integrated shelter)
- Multi-use (large building that include toilets, showers and change rooms)
- Changing Places (special facilities for people with high support needs)

PARK FURNITURE AUSTRALIA

QUALITY OUTDOOR FURNITURE FOR PUBLIC SPACES

COMPANY PROFILE

Park Furniture Australia (PFA) is a Queensland-based manufacturer of outdoor and street furniture that knows the importance of quality and longevity. With an experienced team of inhouse manufacturers and installers, PFA are experts in all aspects of the outdoor furniture industry.

From design and fabrication to installation, PFA provides a seamless, end-to-end service that meets the unique needs of clients. The expert team specialises in delivering solutions that combine durability, aesthetic appeal and unmatched versatility — perfect for sporting venues, recreational spaces, educational institutions and council-managed facilities.

PFA proudly uses sustainable materials to manufacture its products, making its range the largest environmentally friendly outdoor furniture range in Queensland.

PRODUCTS AND SERVICES

When it comes to creating comfortable, functional and visually appealing spaces that will last, the value of high-quality structures cannot be overstated.

PFA's wide range of street furniture includes:

- Street furniture
- Bins and bollards
- Grandstands
- Platforms
- Shelters

For these products, PFA offers:

- Custom designs tailored to individual project specifications
- A range of colours, materials and finishes
- Professional installation and ongoing support

COMPOSITION AND MANUFACTURE

Built to withstand Australia's extreme weather conditions, PFA's structures are corrosion-resistant, low maintenance and fully compliant with Australian building codes. Whether improving a community park, expanding a school campus or upgrading a sports facility, PFA delivers lasting value and peace of mind.

Aiming to reduce the footprint of the products placed in outdoor spaces, PFA has a strong ethos of sustainability, sourcing as much of its raw materials from Australia as possible and from reliably sustainable sources. The ECOPLASWOOD used in PFA products is manufactured out of soft plastics that would otherwise end up in landfill.

SPARK FURNITURE PTY LTD

SPECIALIST DESIGNERS AND FABRICATORS OF STREET AND PUBLIC REALM FURNITURE

COMPANY PROFILE

Since its inception in the late 1980s, SPARK Furniture has taken an integrated approach to the design and fabrication of furniture for public and private realm spaces. Prioritising the aesthetic and the practical aspects of street furniture, Spark ensures the delivery of exceptional outcomes to projects of all sizes.

Spark is a trusted resource for its industrial design expertise and ability to manufacture even the most complex projects to the highest standards. The company is the go-to street furniture fabricators for contractors, city councils, landscape architects and the education sector right around Australia.

Its motto, "better cities begin at street level", drives everything that Spark does.

PRODUCTS AND SERVICES

Spark Furniture specialises in the design of street furniture and public realm infrastructure. Whether it's supplying furniture items from its broad collection, customising an existing design or manufacturing a bespoke structure, all products by Spark meet stringent Australian Standards.

Spark Furniture's range of designs includes:

- Benches
- Picnic settings
- Bins
- Bollards
- Bike racks
- Shelters
- Planters

COMPOSITION AND MANUFACTURE

- Mild steel

ANSTON ARCHITECTURAL PRODUCTS

ARCHITECTURAL CONCRETE ELEMENTS FOR ENDURING PUBLIC OUTDOOR SPACES

COMPANY PROFILE

Anston Architectural Products is a skilled manufacturer and supplier of specialised precast concrete products used to enhance public spaces and landscape architecture. Their team of concrete artisans are highly skilled in the production of standard and bespoke products to suit multiple design applications, having worked on multiple landscape projects all over Australia.

Product offerings include high quality concrete seating, reinforced safety bollards, large-format planters, bespoke signage elements and more. Adopting a collaborative, transparent approach, Anston works with clients to translate their design ideas from concept into completion. With decades of manufacturing experience under their belt, the Anston team welcomes every opportunity to push the boundaries in precast concrete fabrication, resulting in functional, beautiful products that have a lasting place in the built environment.

PRODUCTS AND SERVICES

Anston specialises in the manufacture and supply of architectural precast concrete landscape elements, including:

- Concrete street furniture
- Reinforced concrete bollards
- Concrete planters
- Concrete paving and cladding tiles
- Stair treads and large format steppers
- Bespoke signage elements
- Memorial products such as headstones and plaque bases

Apart from its diverse catalogue range, Anston also offers dedicated support to customers wanting custom products made to suit unique design requirements. Anston can provide guidance and advice on clients' product design concepts, ensuring the product is viable for production, handling and transport.

COMPOSITION AND MANUFACTURE

Anston's architectural precast products are made to the highest standards of quality, ensuring consistent performance, strength characteristics and aesthetic appeal.

The company is accredited against the globally recognised ISO standards for Quality, Environmental Management and Health and Safety, demonstrating a commitment to continuous improvement.

A member of the larger SVC Group, Anston is committed to reducing its environmental impact. The business has invested significantly in environmental initiatives such as renewable energy, rainwater harvesting and the adoption of recycled waste materials in their concrete products, resulting in reduced carbon emissions.

GREENPLATE

COMMERCIAL ELECTRIC BBQ SYSTEMS

COMPANY PROFILE

Greenplate is a family-owned Australian company specialising in the design, manufacture, installation and servicing of energy-efficient commercial electric barbecue systems for public, recreational and commercial environments.

Established in 2004, Greenplate has more than 20 years experience supplying public barbecue solutions to councils, landscape architects, developers, contractors, holiday parks, sporting facilities, apartment developments and commercial facilities throughout Australia and overseas.

The company works closely with landscape architects, project managers, councils, electrical contractors and construction teams to ensure each barbecue system is suitable for its intended location, usage requirements and surrounding landscape design.

Greenplate is part of Cosmos Solar Pty Ltd, an Australian manufacturing business established in 1983. This long manufacturing history has helped Greenplate develop a strong understanding of electrical systems, solar power, product engineering, fabrication and the requirements of equipment installed in demanding public environments.

PRODUCTS AND SERVICES

What makes Greenplate unique is the ability to manage the complete product lifecycle in-house. The Greenplate team designs and develops its products in Australia, supports installation and commissioning, and provides ongoing servicing, spare parts and technical assistance.

By managing these processes internally, Greenplate can provide greater control over product quality, lead times, technical support and long-term serviceability. Products are designed so that key components can be accessed, repaired and replaced, helping asset owners extend the operating life of their barbecue infrastructure.

The Greenplate range includes:

- Energy efficient inbench electric barbecues
- Low-voltage 24V DC barbecue systems
- Solar Standalone off-grid barbecue systems
- Accessible barbecue cabinets
- Single, double and multiple bench configurations
- Custom cabinet and bench configurations
- Smart BBQ monitoring and remote management options
- Art Wrap finishes
- Above-bench switch housings
- Retrofit options
- Barbecue accessories

Custom work is a key part of Greenplate's capability. Options include modifying cabinet dimensions, layouts, access doors, colours, finishes and accessories to suit individual architectural, landscape and site requirements. The barbecue systems can also be integrated into custom-built benches and surrounding landscape elements.

Greenplate barbecue cabinets can be powder coated in a wide range of colours. Timber-look and anodised finishes are also available for selected products such as seating systems.

Greenplate operates under an ISO 9001:2015 certified Quality Management System and is committed to delivering reliable, energy-efficient and serviceable products designed for demanding public environments.

FURPHY FOUNDRY PTY LTD

STREET FURNITURE AND URBAN DESIGN PRODUCTS

COMPANY PROFILE

Furphy Foundry is an iconic Australian manufacturer, with a heritage spanning more than 150 years. Evolving from its origins in agricultural equipment, the company now operates as a modern, advanced manufacturing facility producing high-quality street furniture and urban design solutions.

Proudly made in Victoria, Furphy products are manufactured using renewable energy sources and environmentally responsible processes. With a strong commitment to sustainability, the company focuses on reducing environmental impact through durable design, efficient production methods and the responsible sourcing of materials - ensuring products are built not only for today, but for generations to come.

PRODUCTS AND SERVICES

Furphy Foundry specialises in robust, high-performance products designed to endure the demands of the Australian environment and public use. Through the use of aluminium casting, steel fabrication, timber craftsmanship and advanced coating systems, each product is engineered for strength, longevity and high public use.

Furphy Foundry offers an extensive range of standard products which can be readily supplied across the country. It also offers a design service to assist with modified and custom solutions, should this be a requirement of the project.

Furphy is one of the few Australian manufacturers offering a complete integrated service, from in-house design and local manufacturing through to national installation.

The company's extensive range of street furniture includes:

- Barbecues
- Seats, benches and picnic settings
- Shelters
- Litter bins
- Drinking fountains
- Bollards and bike racks
- Tree grates and surrounds
- Customised urban solutions

Furphy also collaborates with landscape architects and designers to deliver tailored outcomes for civic and public realms projects.

DOGGIE DUNNIES

DOG WASTE SOLUTIONS

COMPANY PROFILE

Doggie Dunnies is an Australian-owned company specialising in solving the ever-increasing problem of dog waste entering landfill with a design fit for purpose. These allow for the clean separation of dog waste from general waste.

Operating since 2018, Doggie Dunnies has its Australian-made units in operation across the country. The company works in tandem with its sister company AMS Products, which has been a supplier of dog waste bag solutions across Australia since 1998.

Using AMS Products' compostable bags, dog waste can be collected and utilised in local councils' green waste programs, avoiding the usual alternative of adding to landfill.

Based on field trial data, one unit alone can save up to 60kg per week from landfill.

PRODUCTS AND SERVICES

Doggie Dunnies is an Australian-owned, manufactured, designed and patented dog public waste bin separation that is available in a range of model options. These include:

- 55L unit with removable galvanised liner
- 240L and 120L bin retainer with custom limiter chute
- 240L retriever lid option — attach to 240L Sulo wheelie bin units
- Brake-spring tensioned bag dispenser units
- Compostable AS4736 dog waste bags (4 models)

COMPOSITION AND MANUFACTURE

Units can be ordered to match a colour theme in a preferred Dulux Powdercoat colour. All fixed units are manufactured from Australian-made steel within ISO9001 manufacturing processes.
